

Make your cloud work for your business

Unlock long-term value in the cloud with Spot by NetApp's suite of CloudOps solutions

By leveraging our products for cloud visibility, automation and optimization across DevOps, FinOps and SecOps teams, businesses can scale the cloud faster, efficiently, securely and cost-effectively.

Who are Spot by NetApp products built for?

DevOps

Build and maintain reliable dynamic cloud infrastructure in a fast, repeatable way.

Cloud Cost Managers

See, understand and take action to reduce cloud costs and improve cloud efficiency.

Security Teams

Keep cloud environment secure and enforce governance and compliance.

ITOps

Provide on-demand, secure, cost-effective cloud desktops

Cloud Leaders

Gain the insights needed to drive cloud initiatives and realize ROI.

Our CloudOps suite

Elastigroup

Scale mission-critical workloads on spot resources

From web applications to stateful services, get automated, optimized cloud infrastructure management that delivers lightning fast autoscaling, maximum cost efficiency and enterprise-level availability.

Ocean Kubernetes Suite

- Ocean Serverless Infrastructure
- Ocean Apache Spark
- Ocean Continuous Delivery

Run microservices to big data workloads with K8s on serverless, optimized cloud infrastructure, and deliver them to production with speed and confidence.

Spot Security

Continuous cloud infrastructure security

Cloud security analysis and threat reduction for actionable compliance, remediation and prevention.

Eco

Optimized utilization of Reserved Instances and Savings Plans on AWS and Azure

Spot Eco simplifies planning, purchasing, and optimization of Savings Plans and Reserved Instances on AWS and Azure. As your infrastructure needs change, Eco automation balances your reserved commitment portfolio to realize the full ROI of your cloud commitments.

Instaclustr

Build and scale reliable applications faster

Instaclustr helps organizations deliver applications at scale by operating and supporting their data infrastructure through its SaaS platform for open source technologies.

CloudCheckr

Actionable cloud cost analysis

Plan, manage and optimize your cloud to get the most out your investment with visibility into cloud performance, cost savings insights and optimization.
